Why Porcelain

- Porcelain is becoming increasingly popular, due to its ability to achieve opulence in its greatest form
- Versatility of the porcelain means it has the capabilities to create indoor to outdoor spaces and vice-versa
- Can be savoured all year round whilst easy to maintain
- Perfect for those with an eye for contemporary style
- Hard wearing, dense, man made product. Formed with a mixture of clay, sand and other minerals
- With a thickness of 20mm makes it suitable to be laid on several bed types

Top Tips

- Prepare and plan
- When using multiple packs, open all packs and randomly select flags from each pack to blend colour variances
- Strongly recommend to coat the back of each tile with slurry primer. Creates a stronger bond
- Continuous water flow applied to paving when cutting and a suitable diamond cutting blade is advised
- 2mm minimum gap between each tile and spacers are recommended. Do not butt joint the tiles

Case Study

I decided to go for something unusual that would stand out. The York stone from 'Roman Stone' must certainly does that. The whole order process was effortless and would highly recommend
